Software Engineer – Full Stack & AI/LLM Applications

Software Engineer with 5 years of experience in full-stack development and 2 years focused on AI/LLM application development. Skilled in building scalable MERN stack applications, integrating LLM APIs, and implementing retrieval-augmented generation (RAG) workflows. Experienced in JavaScript, React.js, Node.js, Express.js, MongoDB, Python, REST APIs, and cloud-based deployments.

Skills:

- Programming Languages: JavaScript, TypeScript, Python, HTML, CSS
- Frontend: React.js, Redux, Next.js, Bootstrap, Material UI
- Backend: Node.js, Express.js , RESTful APIs
- Databases: MongoDB, PostgreSQL, MySQL
- AI/ML: LLM Integration, Prompt Engineering, RAG, Vector Databases, Embeddings, AI Workflow Design
- Tools & Platforms: Git, GitHub, Postman, Docker, AWS, Azure, GCP
- Methodologies: Agile, SDLC, API Design, System Design, Testing, Deployment

Work Experience:

Software Engineer – Full Stack & AI/LLM Applications

Tata Consultancy Services (TCS) **Jan 2025 - Present**

- Developed AI-powered applications using Anthropic Claude and OpenAI APIs to automate customer support and internal knowledge workflows, reducing manual effort by 35%.
- Built scalable Python and Node.js backend services to orchestrate LLM requests, handle real-time user interactions, and integrate with internal systems.
- Implemented Retrieval-Augmented Generation (RAG) solutions using embeddings and vector databases to improve contextual relevance and reduce information lookup time by 40%.
- Designed and optimized prompts, tool-calling logic, and response-handling pipelines to enhance model reliability, accuracy, and performance.
- Integrated AI features into business workflows, automating repetitive tasks and saving 15–20 hours of manual work per week.
- Collaborated with product, QA, and DevOps teams to deploy, monitor, and optimize AI capabilities in production environments.
- Worked with MongoDB, PostgreSQL, and cloud-based deployment environments to deliver secure, scalable, and maintainable AI solutions.

Software Engineer

Tata Consultancy Services (TCS) **June 2022 – Jan 2025**

- Built and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js for both customer-facing and internal business solutions.
- Developed responsive and user-friendly interfaces using React.js and modern frontend practices to improve user engagement and product usability.
- Designed and implemented RESTful APIs, authentication mechanisms, and database schemas for scalable application architecture.
- Improved system performance by optimizing database queries, frontend rendering, and backend logic for faster response times.
- Worked closely with stakeholders to gather requirements, develop features, and deliver end-to-end solutions with a focus on reliability and maintainability.
- Ensured application quality through testing, debugging, and continuous improvements across frontend and backend components.

Education: **Bachelor in Information Technology** **Jun 2018 – Jun 2022**

Aditya Silver Oak Institute of Technology - 9.60 CGPA

Certification:

- Anthropic Certified Claude Developer - Candidate ID : ANTH346548
- Node.JS Course - Udemy
- Next.JS Course - Udemy
- MongoDB Course - Udemy
